Gentlemen:

You have recently been issued a Discharge Permit by the State of Michigan. In accordance with the "monitoring requirements" of your permit you are required to submit reports on specified effluent characteristics on the enclosed forms each month.

Please see that the person in charge of the wastewater treatment plant receives this letter and enclosures.

Read the instructions on the reverse side of the forms very carefully. You should review the coded items on the form and compare the information required with the provisions of the permit. It is extremely important that the person completing the form understands the requirements of the permit.

The forms should be signed by the certified operator and the Principal Executive Officer or his authorized agent. This authorized agent will be the plant manager or another individual involved in supervising the facility. It is not necessary that these forms be sent to corporate headquarters for signature.

You should immediately start recording monitoring data on the Monthly Operating Reports and submitting them as required by the permit. A sample completed report is enclosed for reference.

If there are any questions regarding the forms please contact me at 517-373-1947 or your district engineer at the number shown on the enclosed map.

Very truly yours,

WATER RESOURCES COMMISSION

Robert J. Courchaine
Chief Engineer

by *Karl Zollner, Jr., P.E.*
Regional Engineer
